

"I HELP WITH WORDS"

Her hand and pen are Ursula Armijo-Knobel's tools for the spiritual helpers from the other side. "That is how I answer all kinds of questions" says automatic writing medium from Zug.

When asked questions, without thinking, Ursula Armijo-Knobel, who speaks four foreign languages, writes the answers automatically in a psychic way.

During her first marriage, while living in the US State of Colorado, Ursula Armijo-Knobel (64), learned the automatic writing from well known psychic Betty Johnson, also an automatic writing medium. "This woman mentioned things in her first reading she did for me which happened 20 years later", says the ex-bookseller. Besides "Soul Writing" (automatic writing) she has been interested in many other psychic phenomenons for years.

An automatic writing medium taps into the soul.

"It has been researched, that legendary abbess Hildegard von Bingen who lived in Medieval times, received her great knowledge through automatic writing", explains the ex-project manager who lives in Zug and is being helped by her spiritual guides from the spheres of light on the other side. "When a soul is between two earth lives, the soul stores the past and plans the future. Helpers have access to this level and can retrieve answers from the super-consciousness of the person asking questions", she explains her psychic work.

Armijo-Knobel (schreibmedium.com) has many clients with business related and personal questions. Through her hand the answers flow automatically. Amongst them: How elections would turn out, where to find a will, to resolve the reason why two toddlers were screaming every night (having to do with unhappy souls marching through their bedroom). The psychic cautions: "It is extremely difficult to find missing pets or misplaced items".
